Catarrh of the Stomach is very common and is known as one of the most obstinate disease, which, when neglected or improperly treated with cheap patent, medicines, tonics, drugs, pills and other secret quack remedies, results in a broken flow constitution and often consumption and death.

Catarrh of the Stomach, ilke every other disease of the stomach, except cancer, is the result of poor digestion. The digestive organs have become weak, there is a lack of gastric juice, your food is only half digested, and as a result you become effected with loss of appetite, pressure and fullness after eating, heartburn, vomiting, waterbrash, tenderness at pit of stomach, slimy tongue, bad taste in the mouth, constipation, pain in limbs and face, sleeplessness, nausea, belching of gas, and many other common symptoms. If your stomach cannot digest the I food you cat, then the stomach needs a prest, as that is the only way you can get rid of your catarrh, but in the meantime your body needs plenty of nourishment, because you must live, and in order to live you must eat, and if you must eat, your food must be properly digested, and if your stomach is too weak to do the work.
